

PV-ezRack SolarRoof Interface for Klip Lok Type Roofs

Stop drilling into the roof!

To mount solar panels on Klip Lok type roofs you usually have to drill holes into the cladding, causing permanent damage to the roof. This new bracket from Cleenergy provides you with a new non-penetrating solution. The bracket can be attached directly on most of the Klip Lok type roofs and allows you to install tilt leg kits.

Technical Data

Roof Type:	Klip Lok 406 Klip Lok 700 Speed Deck Ultra
Mounting Method:	Clamping
Colour:	Silver
Compatibility:	ER-TL range (Tilt Legs) ER-I-05 (L Feet) ER-IC and ER-EC (Clamps)
Standards:	AS/NZS1170
Material:	AL/6005-T5, EPDM rubber
Warranty:	10 years*

Key Benefits

Easy Installation

The interface for Klip Lok type roofs designed by Cleenergy just needs to be clamped to the top of ridges and is secured using an Allen key.

High Compatibility

This interface can be used on most of the Klip Lok type claddings making it almost universal.

Multifunction

The Klip-lok type interface can meet most installation requirements tilted or flushed.

Engineered to High Standards

The product is made to the highest standards, safe and strong. It's designed and certified to comply with AS/NZS1170.

Maximum Lifespan

This interface is made of high-quality extruded anodised aluminium. The high corrosion resistance guarantees the maximum possible lifespan and is also completely recyclable.

10 Year Warranty

Cleenergy provides a guarantee of 10 years on the durability of materials.
